HARI BHAMBHANI

ASPIRING SOFTWARE ENGINEER

+91 9320474520 haribhambhani24@gmail.com

EDUCATION

VIVEKANAND EDUCATION SOCIETY'S INSTITUTE OF TECHNOLOGY (VESIT), CHEMBUR, MUMBAI
BTech, Computer Engineering (2025-2029)
CGPA- 7.84 (Till sem2)

CHANDIBAI HIMATHMAL MANSUKHANI COLLEGE (CHM), ULHASNAGAR
HSC - Science Stream

GURU NANAK ENGLISH HIGH SCHOOL (GNEHS), KALYAN
SSC, Secondary, Primary & Pre-Primary

TECHNICAL SKILLS

- Data Structures & Algorithms (Linear Data Structures)
- Object-Oriented Programming
- Java
- SQL & Database Concepts (Basics)
- HTML, CSS (Basics)
- Git & GitHub, Debugging, Technical Documentation

CERTIFICATIONS

HACK-AI-THON 4.0
CERTIFICATE OF ACHIEVEMENT
Completed the 24-hour online Hack-AI-Thon 4.0 conducted by AI-CoLegion, the Artificial Intelligence & Data Science department committee, VESIT.

SYRUS HACKATHON 0.6
CERTIFICATE OF PARTICIPATION
Participated in an Industry Sponsored Hackathon conducted by CodeCell++, the Department of Computer Engineering, VESIT.

SOFT SKILLS

- Problem-solving & analytical thinking
- Written communication & clear technical explanations
- Teamwork & adaptability
- Time management & meeting deadlines
- Willingness to learn new technologies

ABOUT ME

Second-year Computer Engineering student at VESIT (CGPA 7.84) with a strong foundation in Data Structures, Object-Oriented Programming in Java and SQL, looking for a Graduate Software Engineer / Trainee role. I write clean, readable code, debug and fix errors methodically, and use Git and GitHub for version control.

Through Hack-AI-Thon 4.0 and the SYRUS Hackathon I learned to learn quickly, troubleshoot under tight deadlines and work effectively in a team. I document my work through detailed project and lab reports, and I am eager to learn new languages, frameworks and tools while contributing to real-world software under the guidance of senior developers.

PROJECTS

POLYNOMIAL REPRESENTATION AND ADDITION *Java | Micro Project*
- Implemented polynomial representation using linked lists, with a function to add two polynomials.
- Tested with sample inputs, fixed errors and documented the algorithm, code and outputs in a project report.

PERSONAL PORTFOLIO WEBSITE *HTML, CSS, GitHub Pages*
- Developed and deployed a clean portfolio website to display engineering projects and achievements.
- Generated the core layout using AI-assisted development tools to explore how modern front-end pages are structured.
- Applied basic HTML, edited CSS rules and customised colours, alignment and section layouts.
- Published the repository to GitHub to practise version control and online deployment.

ACADEMIC WORK

- Implemented ADTs in Java: stacks and queues (array and linked list), circular queue, and singly, doubly and circular linked lists.
- Wrote technical lab reports covering theory, algorithm, code, output and the errors faced and fixed; wrote SQL queries and practised triggers and deadlock handling in the DBMS lab.
